**Lastmod by**: tobi_h

**Rating**: ★ ★ ★ ★ ★ ★ ★ ★ ★ ★ ★ ★ ★ ★ ★ ★ ★ (0)

**Description**
Content Templates are an easy and comfortable way to change the look and content of wiki pages. It would be nice to be able to define such a template as your default for wiki pages, instead of having to choose it every single time you create a new wiki page, or changing the template of wiki pages in general.

**Solution**
Allow one of possibly many content templates to be the default template for new wiki pages.

**Importance**: 6

**Priority**: 30

The pages on this site:

Is expected to predominantly be "design patterns", for which I have defined a template. I have created a QuickEdit form which automatically uses that template. But I still have the problem that if users click on a dangling question mark link to create a page, they have to manually choose the template. But most of my users are not that familiar with Tiki and may not know how to do this.

Alain Désilets

It is better to have such parameter
if do so, it is easy to create a module to create wiki pages from different template based on user's input.
this would be a very useful feature, tiki should take it.
