Description

- polls (Could be with trackers)
 - need a way to insure people vote only once (more of a voting system than polls).
 - Possibly with unique URL sent by email
 - Not sure, but probably that votes need to be anonymous (We know who voted but not for whom)
 - Need a way to remind people that haven't voted.
 - CRM style wiki & tracker merge
 - Do a query on trackers (ex. people that haven't voted)
 - Cross with a wiki page to create a form letter "Dear XYZ, according to our records, you have not voted. Please click here to vote.
