Description

Since I upgraded to 3.0 from a 2.x I lost the mytiki item on the left menu and I don't know how to restore it. I'm using coalesce theme. Mine website is www.magowiz.net

Solution

I was able to restore mytiki menu:
in Admin->Menus I clicked on Configure/Options in Application Menu (the only menu I have)
I clicked on Export (also Import works) then I found "MyTiki (click!)" option and remove from
Sections "feature_mytiki" that was there and now in the left menu I get back MiTiki (click!) option .

And I know how to fix the problem - in theory. Open "Look and Feel". Select "General Layout". Change menu item to your own menu. Then Apply.

My problem is that saving the information does not work.

magowiz 28 Jun 09 09:59 GMT-0000

I opened Look and Feel and selected General Layout but I cannot see "menu item", I didn't understand what to do....
