Description

Hi,

I have set the following permissions for Anonymous

tiki\_p\_view

tiki\_p\_view\_categories

tiki\_p\_view\_categorized

etc

and the following category permissions

Anonymous tiki\_p\_view\_categories

Registered tiki\_p\_admin\_categories

Assign permissions automatically: Yes

Despite this neither Anonymous or Registered can view pages that have been categorized, the categories appear empty. Only way I can change this is by changing permissions on each individual page.

I've tried and tested this on 3 different installs, same problem each time. I am quite new to this but have spent many hours on this issue and would appreciate any advice.

I'm sure that there's a way but how?

Cheers
