- Feature request
- Documentation (or Advocacy)

Feature

User Administration (Registration, Login & Banning)

Resolution status

New

Rating

(0)

Description

When people register to a Tiki site, they sometimes use their email instead of a username. While this works, there should be a warning that this email will be visible in wiki page history, etc.

There is an option to use email as username, but this should not be for community sites.

Other checks would be for accents, existing username, etc.
