

```
$user = $_REQUEST'user';
$_SESSION%22$user_cookie_site%22 = $user;
- header('Location: tiki-information.php?msg='.urlencode('Account validated successfully.));

+ header('Location: tiki-view_tracker_item.php?view=+user');
```

Note: tiki-view\_tracker\_item.php?view=+user is necessary vs for example sending to a "My Profile" wiki page (for example)

This is a second bug/feature request
