hello,

I have just identified the same problem on my website (TikiWiki 3.1). I have a structure with 5 main sections, but when displaying the matching 5 pages, they are numbered 1, 2, 6, 9, 10. instead of 1 to 5.

I tried to find a workaround by changing the order of these 5 sections, hoping they may be re-numbered correctly, but it did not work.
