### Description

It is impossible to activate various Functions...

In the Administration Menu under "Editing and Plugins" it is impossible to activate functions like "google analytics" and lots more... everytime I want to save I get a "permission denied"

□□□□□□□□

Forbidden You don't have permission to access /content/tiki-admin.php on this server.

The Module is unusable right at the moment...

I did:

- disable the searchengine friendly urls
- did a complete reinstall
- applied chmod 755 over everything

Nothing did work...
