Description

I've just installed TW and am focused on the wiki functions at this point. Wiki pages display correctly in Firefox 3.5.2 but as a thin right hand column on IE 7 or 8. The columns get a bit wider once you login to the wiki in IE but not by much. Admin functions are squished in IE but look fine in Firefox as well.

I can't seem to find this in any FAQs or other support links and would appreciate some help.
