Description

In current tiki3 proposed branch , multitiki installation is broken.
At the last step of installation through tiki-install.php, the folders inside /templates_c for each domain are deleted.

Thus, when in this step:
<http://localhost/site1/tiki-install.php?nolockenter>

tiki reports that
The directory '/var/www/proposed/modules/cache/learning' does not exist.
The directory '/var/www/proposed/templates_c/learning' does not exist.

And they did exist in the step before (double checked), but not just after that step.

(see <http://doc.tikiwiki.org/Manual+Installation> of multitikis if needed)

-

Update in Oct'09: This is a duplicated bug report with bug2271
Closing.

Solution

Clean cache at installation time BUT ONLY FOR THE TIKIDOMAIN selected in the local.php file for the tiki being installed.

Hi xavi,
isn't this a duplicate of 2271?

Xavier de Pedro 15 Oct 09 09:47 GMT-0000

you are right, chealer! (my mistake) Marked as such and closed.
