Description
Tested in v3.1 on XP/IEv6, Vista/IEv7, Vista/Firefox. The help button (blue circle w/ question mark) next to "Advanced Search" in the module search_box does not bring up any help info. Instead, it points to the anchor #advanced_search_help on whatever page the user is viewing, but the anchor doesn't exist. IE shows an "Error on page" in the browser status bar.

Tested in XP/IEv6 with "Floating Help" UI feature on - same result. Unknown if "Floating Help" changes results in IEv7 or FF.
