Description

although they have tiki_p_admin_forum permission=n (on v3.2).
My forum mods gets on tiki-view_forum.php?forumId=<int> the "Edit forum" button, which should be visible to forum admin only.
If they click on the button they get the error messages about missing permissions, so there is no serious problem with it, but it's confusing to see this button.

I've looked over templates/tiki-view_forum.tpl but didn't see anything as explanation for this.
(Btw: the if/else clause from line 15 to 19 doesn't make a sense (for me); it makes the same, never mind the case of the if-clause)
