Description

When I made a Directory Batch importation of files, when I go to the gallery where I put my files, the size of those files is "0 B".

Environment:

Ubuntu Server 8.04
ISPConfig 2

Step to reproduce:

1. Make a new directory outside the TIKIWiki path. (for example Making a new Site with ISPConfig)
2. Configure in the File Gallery Administration panel the path of this directory.
3. check the "store in database" option is selected
4. upload with ftp or copy some files in the thirectory created
5. Open directory Batch
6. Check "Select all" option
7. Check "Remove file extension" option
8. Select a file gallery and "Process Files"

Note: I have also some accented characters in the original filenames. For example "26 Controllo qualità morsettiere.rtf".
