On tracker watches, it seems that only one mail is sent with all the emails in the "to".

It wasn't always like that. This is a change of behavior (I consider it a micro-bug) introduced less than 1-2 years ago (AFAIK).

So since one mail is sent to several people, and these people have different language preferences, it's expected that "Watches appear in foreign languages"

Philippe Cloutier 31 Dec 10 18:42 GMT-0000

This seems to work fine in current trunk. I just fixed another bug introduced in 5 that could have brought back a similar problem, please retest with at least r31696, on proposals/6.x or trunk. For reference, see trklib->replace_item().
