Description
RoadMap shows "Fatal error: Call to undefined method TikiDate::getDate() in /home/tiki/public_html/lib/wiki-plugins/wikiplugin_countdown.php on line 60". This happens when using the COUNTDOWN plugin on PHP 5.1 and later due to a missing definition of getDate() in the lib/tikidate-php5.php TikiDate. The old TikiDate (lib/tikidate-pear-date.php) declared that function (via inheritance).

This was introduced in r14129 and widely exposed in r20047 on lib/tikidate.php.
