We are running into an issue of maketoc appending onto itself if more than one maketoc appear per page. For starters, our server is TikiWiki 3.2, Windows Server 2003, apache 2.2.13, mysql 5.1.39, php 5.3.0, Multiwiki setup.

We are seeing this in Multiprint. What I am seeing is that if I have Tikipage A with a \{maketoc\} at the VERY top and headings 1, 2, 3 and Tikipage B with a \{maketoc\} at the VERY top and headings 4, 5. When I Multiprint using the Pages selector (both Tikipage A and Tikipage B) there will be 2 TOCs displayed in the resulting print page. The first TOC will show 1,2,3 and further down the page will be 1,2,3,4,5 (when I expected only 4,5). We are trying to Multiprint hundreds of pages (and most have their own maketoc) so the very last TOC takes up 15 pages itself (after accumulating TOCS over 100s of wiki pages). Big problem for us as our nurses need to have a hardcopy/offline copy on hand in case our systems go down.
So it is the parsing of the maketoc that is causing the appending of subsequent TOCs. I found a bug by "larryg" where he tries to fix a similar issue (cf TOC and MAKETOC functionality when using Multiple Print and http://tikiwiki.org/tiki-view_forum_thread.php?topics_offset=1&forumId=2&comments_parentId=34791) but his fix did not work for me. I think that he is on the right track. Does anyone know of a fix? Has anyone experienced this? Is it fixed in 4.x?

Thanks in advance,

Tim

I installed 4.0 and upgraded a copy of the database and I am still seeing the TOC issue in search results.

TPINET,

Sorry to hear you are having problems with my TOC and MAKETOC routines. I am running them in v3.3, not sure if any changes were inserted in v4.0 beta.

You can visit my site at: http://n1mm.hamdocs.com

or go right to the large (300+) document at:
I would also be happy to assist you directly. Use the Contact Us link on that website to send me email.

with multiprint
did not test search
I could send you my structure / pages if it would help tracking down this issue.
Is there any workaround?

Does this solve it? [http://doc.tiki.org/Auto+TOC](http://doc.tiki.org/Auto+TOC)

**Philippe Cloutier** 08 May 18 19:13 GMT-0000

This is visibly related to issue maketoc generates "super Table of Contents" with too many headings in MultiPrint.

**Philippe Cloutier** 09 May 18 12:47 GMT-0000

Sorry, I meant to write that this is visibly related to issue maketoc adds bogus content to search index, causing false positives.

**Philippe Cloutier** 08 Jun 18 15:51 GMT-0000

The search issue is visibly solved in Tiki 15.6. I am retitling the ticket to focus only on MultiPrint.

**Philippe Cloutier** 08 Jun 18 16:01 GMT-0000

The issue of maketoc generating excessive headings when printing multiple pages with Multi-print persists in Tiki 18 and can be seen on doc.tiki.org, for example when
