Subject
Account disable after validating new account

Version
4.x

Category
- Error

Feature
User Administration (Registration, Login & Banning)

Lastmod by
swainstm

Rating
★ ★ ★ ★ ★ (0) ❓

Description
I can't seem to get the self registration of a new user to work in a new install of Tikiwiki 4.0. I can do the self registration, and get the email to validate, and can even successfully validate the account. However, once validated, any subsequent time I try to resign on, I get "Error" page showing "Account Disabled".

yacine 09 Dec 09 17:43 GMT-0000

I, same issue here (installed from scratch).

swainstm 10 Dec 09 11:27 GMT-0000

I have found another ticket ID 2886 at
http://dev.tikiwiki.org/tiki-view_tracker_item.php?itemId=2886&trackerId=5&show=view&reloff=0&ca
nt=1&status=o&trackerId=5&sort_mode=f_41_desc&filterfield=26&filtervalue26=account%20disable
d

It is also worth noting that I had this issue with clean install of Tikiwiki 4.0 on a clean install on Ubuntu
Server 9.10.

TheHellYouSay 15 Dec 09 21:15 GMT-0000

When I go to validate a new user while logged in as admin I immediately get an error about Invalid
Username or Password which is not quite the same, but obviously is indicative of some logic that thinks
it needs to do some authentication.

adoucette 20 Dec 09 18:25 GMT-0000

same issue here. clean install of 4.0 then upgraded to 4.1

zengatsynopsys 21 Dec 09 08:31 GMT-0000

new installation of 4.0 on RHEL5.3.
Apache 2.2.3
PHP 5.1.6
MySQL 5.0.45

adoucette 28 Dec 09 22:39 GMT-0000

I had the same issue. Clean upload and install of 4.0 then upgraded to 4.1.
Wiping it all and doing a clean upload and install of 4.1 seems to have fixed the issue.
