Description

Exporting a tracker does not work when selecting a custom default sort order field for the tracker.

Fields that do work :

itemId

Created

Lastmodif

All other fields will result in a csv file containing the error page html code.

It seems that the order by value in the SQL statement is not properly generated.

File tiki-export_tracker.php

Url tiki-export_tracker.php

Query:

```
select * from `tiki_tracker_items` tti where tti.`trackerId`=? order by `` desc
```

Values:

0 4

Message:

Built query was probably:

```
select * from `tiki_tracker_items` tti where tti.`trackerId`='4' order by `` desc
```

Solution

Fixed commit 23593 in 4.1
