Description
My users, sub-Admins, Editors, and registered users cannot edit any wiki page(s) because they cannot see the Category tab when editing any wiki page. Any edits are not saved. The wiki says a Category is mandatory, even if the page being edited is already Categorized.

Workaround
None that I can think of. Right now I am editing pages with only the Admin account.

Importance
9 high

you need to give them the permission tiki_p_modify_object_categories
http://doc.tikiwiki.org/Tiki4#Category_permissions
