### Description

Update, DEC 30 2009 -

(1) Shadowbox/Colorbox is working in Wiki pages  
(path error 1st time around - my fault)

(2) Shadowbox/Colorbox still **NOT working** in File Galleries.

(3) Slideshow works in File Galleries ONLY if using Mozilla Firefox or IE 8, if IE 8 not running in compatibility mode (I.E. 6,7 fail to display the slideshow)

-----  
Neither the slideshow nor the new colorbox (shadowbox replacement?) features seem to work in Tiki 4.0. Both slideshow and shadowbox have checkboxes in the Admin panels. Are there any other supporting features that need to be enabled.

Note: The thumbnail generator seems to work much better for the file gallery in 4.0 than in 3.x or 2.x.

### Workaround

please retest with currently supported tiki versions (it's an outdated bug report as-is otherwise).

These work generally in Tiki 4.0 installs, so apparently there is an installation or configuration problem at that particular site, seems to me.

Ed 14 Dec 09 18:55 GMT-0000

Hi, chibaguy:

So far I have been unable to get the new colorbox (replacement to shadowbox) working. I have installed Tiki 4.0 on CentOS 5.0 and Windows XP SP3 and both display the same results...click on the image (in browse mode) and a shadowbox/colorbox starts, but instantly shrinks to a small white oval, with no display of the picture. I have enabled both Shadowbox and JQuery UI under "Look & Feel >> UI Effects". Even without "JQuery UI" checked (only shadowbox checked) the result is the same. There seems to be no documentation yet on how to configure Colorbox

Ed 30 Dec 09 18:46 GMT-0000

Just turned on the "Image Gallery" (as opposed to file gallery) feature, and the Shadow/Colorbox works great (and as expected) for browsing images.

It seems that the "File Gallery" feature is having the colorbox problems. I have tried toggling on and off the "Editing and Plugins >> Use File Galleries to store pictures" configuration, but it made no difference on or off. Colorbox/Shadowbox does not seem to work for images that are stored in the file galleries (if images therein are being "browsed" rather than listed - then clicking on the image brings up a non-functioning shadowbox).
