Description

>   Good:
>
>   Since Tiki4, in tiki-admin_include_sefurl.php, Tiki detects if .htaccess is there and if contains tiki-index.php?page=$1
>
>   But:
>   If Tiki is upgraded, by installing over, there may be issues because Tiki is still using the old .htaccess without informing tiki admin
>
>
>   Proposal:
>   Have Tiki version number in _htaccess (and thus updated as part of the release procedure)
>   Test on this, and inform users when they forgot to upgrade their .htaccess file.

Solution

>   Fixed in recent versions of Tiki

Importance
    9 high
