Description
 Application of the Company_Intranet_4x after a new installation with the Barebones install, installs 2
 profiles.

- Company_Intranet
- Company_Intranet_4x

 The installation of both profiles completes successfully however it results in some duplicate content
 that is automatically created by the profile. (I.E. there are two "Support" Forums)

 I have tested and confirmed this from revision number 22637-24054.

Solution
 The only solution I have found is to install just the Company_Intranet profile instead of the
 Company_Intranet_4x which is not really a workaround.

Workaround
 No workaround.
