Description
OLD DESCRIPTION: When editing a tracker textarea with quicktags enabled, the quicktags field shows quicktags for map-editing.

PROBLEM REPHRASED: All Quicktags are shown, when editing tracker items. You can see that e.g. the IMG-quicktag is there twice.

I tried adding the img quicktag with feature "tracker" to tiki_quicktags, but then it was shown trice (triple? - no!), well, three times! ;)

Solution
Quicktags get checked for category "trackers"

initial database-fill still needed
Importance
7
