Description
If one has a structure (s1) that is restricted (in terms of extening) to ordinary users and a second structure (s2) that can be extended by everyone, everything works as expected. if one links s2 into s1 by adding the page to s1 ordinary users are unable to add pages to s2 using the navigationbar when navigating from s1 to s2 although they can if they use the structure admin panel tiki-index.php page= s2&structure=s2&page_ref_id=2

i've been recognizing this in tiki 4.1 in 4.0 this was not a problem at all (as far as i remember)
