Description
Hi,

I just used the feature Change all to File in Manage Attachment page (wikiatt) and I have lost all the link in wiki pages to the attachments.

in the root directory of tikiwiki have appeared all the file attachment in this format fad8af90189c10a80f8712263d74fa50

In Manage Attachment I click the Change buttom to come back to db storege without success

I am confused and thinking in restoring tiki_wiki_attachments table.

any suggestions

thank in advance
