Description
> When on a wiki page on my tiki, I have the options available to watch the specific page or to
> "Monitor the sub-structure". When clicking on the latter, I am redirected to a permission denied
> page and the watch for the sub-structure is not set.
>
> Even admin is being denied the permission to set a sub-structure watch on a wiki page.
>
> Setting a watch on a sub-structure inside the structure-admin menu works fine for any permitted,
> though.

Solution
> On version 4.1 the following code can be found in tiki-index.php line number 411:
>
> 口口口口口口
>
> ---
>
> if (($_REQUEST['watch_action'] == 'add_desc' ||
> $_REQUEST['watch_action'] == 'remove_desc') &&
> $objectperms->watch_structure) { $access->display_error($page, tra('Permission
> denied'), '403'); }
>
> If i am not mistaken, $objectperms->watch_structure should return true, if the rights are given to
> watch the structure. So having the rights AND requesting a watch will result in permission denied,

which is basicly the opposite of the intended.

The following code works for me an *should* be the appropriate fix (as mentioned, if I am not mistaken).

░░░░░░░

```
if (($_REQUEST['watch_action'] == 'add_desc' ||
$_REQUEST['watch_action'] == 'remove_desc') &amp;&amp;
!$objectperms-&gt;watch_structure ) { $access-&gt;display_error( $page, tra('Permission
denied'), '403'); }
$objectperms-&gt;watch_structure simply negated.
```
