Description

section edit icons in non-editable menupage (from module) are shown when page in central column is editable.

(Ajax enabled, in case it matters)

The links in section edit icons open the central column page for editing, not the menupage one, but anyway, confusion is added to users... (plus icons non-WYSIWYCA on the menu page)

It should be easily reproducible on dev.tw.o.

Using Tiki 4.1.
