Description

Many (most) websites require the use of both a main menu and a secondary menu.

Solution

The main menu can be activated from Site Identity. Activating a secondary menu could also be built-in.

I suggest having zones like
instead of just 42. To make sure admins know what to do, put an example in the surrounding help.

For upgrade script, just take number and replace via the upgrade script.

So then, we can customize more. Ex.: alternate menu per language.

http://doc.tikiwiki.org/Multilingual+Menu#Check_language_and_show_alternate_menu

Also, use the contextual menu

http://doc.tikiwiki.org/Menu#Contextual_menu_example
