Description
When a registered user create a bookmark folder in my tiki. The navigation link showed in the user bookmark folder such as

_____________________
top Current folder: test-folder>childtest |
_____________________

When i click on top, the link takes me to the appropriate section. But, when i click on the test-folder or childtest link it produce an error similar to this.

_____________________
Notice: invalid variable value: $_GET%22parentId%22 = "1" |
_____________________

Everything works as expected except the navigation link mentioned.

Please help.
