Do you have same opinion ?

Rodrigo Primo 15 Jul 15 22:51 GMT-0000

It would be good to hear from LPH on this matter since he is the author of TRIM.

I don't see a good reason to replace PECL's ssh2 extension with phpseclib now. I don't think it is hard to install PECL's ssh2 (at least not on Ubuntu and ClearOS, in both distros all I had to do was install a package) and as far as I know we don't have reports of users having instability problems with TRIM. At least for TRIM PECL's ssh2 is working well.

In the future if we decide to add a significant amount of new features to TRIM it is worth revisiting this idea. It seems to me that phpseclib has an easier API than PECL's ssh2.

Marc Laporte 15 Jul 15 23:17 GMT-0000

Ok, sounds good!

It's true that it's now easy to install compared to a few years ago.

Thanks!
