The particular category "in progress" has no group-specific permission (standard / yellow)

The article has category "in progress" assigned.

Anonymous can't see the article.

Ridiculous is, that if i try to assign a specific permission to the category "in progress", just the following two permissions are available for selection:

tiki\_p\_view\_categories  
tiki\_p\_admin\_categories

Even if i assign those to the category for anonymous, they are not able to see the article.
