Queria report that found errors in the menu id = 42

When I click on calendar, article, forum, blog, tikisheet, and others who do not remember, I get page not found error ... I determined to change the menu but when I make changes, do not save them.

When I create wiki pages gives me the same error when saving I get page not found

It's what I found as far error.

Thank you very much for everything.

No se que soluci3n les puedo decir ya que de programaci3n no se mucho, aunque me gustaria aprender para poder ayudarles en este proyecto tan bueno y completo.

No solution can tell you that since programming is not much, but I would like to learn to help in this project as good and complete.
