Description
 I'm trying to tame articles section and encountered strange problem. My tiki-edit_article.php looks like on this snapshot: http://img716.yfrog.com/i/tikieditarticle.png/ (external link) - so, no pretty formatted forms and - how bad! - no Preview or Save buttons 😕

 Other edit pages (e.g. wiki) look fine - only this one is other. I played with permissions, plugins and features - no luck.

 According to hints from forum I cleared cache. I'm using The News theme (unchanged). Also CSS and TPL files was untouched. I downloaded TW installation files once again and replaced "suspicious" files (tiki-edit_article.php and .tpl). Problem still persists. I checked many browsers: Firefox, Opera, Chromium, Konqueror and Internet Explorer - no difference.

 I checked with LTS version - it works good. Trunk - not working. 4.1 from daily buid - not working.

 I checked Opera's error console:

 CSS - http://localhost/tiki/tiki-edit_article.php (external link)
 HTML style attribute
 Declaration syntax error
 Line 1:
 display:;

 --^

 This message is repeated 8 times.

 In XHTML source (i.e. viewed in Chromium) tiki-edit_article.php hasn't DOCTYPE declaration and

bare HTML tag - no xmlns, no lang etc. - maybe this is a reason? I attach two screenshots from Chromium error console: first one is from tiki-edit_article.php, second one - from tiki-editpage.php. If you look into XHTML code, you'll see the difference.

http://img685.imageshack.us/img685/4858/tikieditarticle2.png

Can anybode help me or check his/her installation? Maybe my TW is broken? I'm using openSUSE 11.2 x86_64.
