Description

Hello.

I need to improve a SEFUrl feature.

The point is that it lacks some functionality needed to be a perfect tool for webmaster or seo specialist or both.

It claims to rewrite urls into shorter and more meaningful ones. However the urls with the title in language other than english (i.e. russian) have nothing after "articleN" (english version is "articleN-the-name-of-the-article").

In addition if an article is divided into several pages there will be urls like "articleN&page=M", no title in them.

Forums and its threads have no meaningful part at all.

It would be great if there are links like this

<http://example.com/articles/this-article-is-about-sefurl-feuture-in-tikiwiki>

<http://example.com/test-forum/the-main-topic>

Could you please suggest on how to do it or maybe there is already rewritten or similar feature somewhere i can find?

## Comments

**Marc Laporte** 03 Mar 10 16:06 GMT-0000

Is it important to use slashes (/) ?

It can make things more complicated...

**Gergely** 03 Nov 10 21:48 GMT-0000

another hyphen would do I think
