Description
    Categories are not assigned like they are asked to in the group settings.

    "Default category assigned to uncategorized objects edited by a user with this default group:"

    Group chosen is not auto assigned.

    Categories are also not assigned like they are asked to in the Staging and Approval settings. I will
    be told I am creating a staging document, it will add the prefix, etc. However, it will not move it to
    the chosen staging category.

    I have tried this with fresh installs of 4.1 and no profile loaded during initial setup.
