Description

When you upload an zip file into file gallery and choose "unzip zip files" the checkbox to choose a category has no effect. It would be nice, that all extracted files have the chosen category.

I use TikiWiki 4.2.

Workaround

In lib/filegals/filegallib.php I added the following lines between "\$fileId = \$this->insert_file(...)" and "unlink (\$extract_dir.\$file)" (around line 400):

Insertations

```
global $tikilib,$formId,$_REQUEST; $foo = parse_url($_SERVER["REQUEST_URI"]); $foo1 =
str_replace("tiki-upload_file", "tiki-download_file", $foo["path"]); $url_browse =
$tikilib->httpPrefix() . $foo1; $cat_type = 'file'; $cat_objid = $fileId; $cat_desc =
substr($description, 0, 200); $cat_name = $name; $cat_href = $podCastGallery ? " : $url_browse
."?fileId=" . $fileId; $cat_object_exists = (bool) $fileId; include('categorize.php');
```

A very temporary solution.
