Description

A weird bug which was showing in tiki 4.x (calendar), and nowadays, I've seen something similar using 5.x alpha at dev.tw.o:

The user is redirected to a blank page with just an email address shown, even if the user didn't click anywhere.

To reproduce:

[http://dev.tikiwiki.org/tiki-view\\_tracker.php?trackerId=5&status=o&sort\\_mode=f\\_41\\_desc&filterfield=54&&filter](http://dev.tikiwiki.org/tiki-view_tracker.php?trackerId=5&status=o&sort_mode=f_41_desc&filterfield=54&&filter)

value54=xavi&&&filtervalue56=Accepted&&offset=30

Pass the mouse over the item saying "2 errors editing articles in tiki 3.3".

With no click (just passing the mouse over, using Firefox 3.6.2), you are shown a blank page with just "email@domain.org" on top.

That item corresponds to:

<http://dev.tikiwiki.org/bug2893>

This is something which is also happening to a calendar in a tiki 4.x site, when the event body has some email address, it seems.

HTH

Solution

Fixed at least in 12.x
