Description

Hello,

I just submit a new search, the SQL request crashes with "system error" as reported in item 3104.

This seems to be solved a few days ago, but it was not a full solution.

Here beyond the beginning of the request :

```
SELECT tti.*, ttif.`value`, ttf.`type`, sttif.`value` as `sortvalue` FROM ( `tiki_tracker_items` tti
INNER JOIN `tiki_tracker_item_fields` ttif ON tti.`itemId` = ttif.`itemId` INNER JOIN
`tiki_tracker_fields` ttf ON ttf.`fieldId` = ttif.`fieldId`) LEFT JOIN ( `tiki_tracker_item_fields` sttif)
ON (tti.`itemId` = sttif.`itemId` AND sttif.`fieldId` = 41) INNER JOIN `tiki_tracker_item_fields`
ttif0 ON (ttif0.`itemId` = ttif.`itemId`) INNER JOIN `tiki_objects` tob43 ON (tob43.`itemId` =
tti.`itemId`) INNER JOIN `tiki_category_objects` tco43 ON (tob43.`objectId` = tco43.`catObjectId`)
INNER JOIN `tiki_tracker_item_fields` ttif1 ON (ttif1.`itemId` = ttif0.`itemId`) INNER JOIN
`tiki_objects` tob47 ON (tob47.`itemId` = tti.`itemId`) INNER JOIN `tiki_category_objects` tco47
ON (tob47.`objectId` = tco47.`catObjectId`) WHERE tti.`trackerId` = ? and (`status`=? or
`status`=?) AND ttif0.`fieldId`=? AND tob43.`type` = 'trackeritem' AND tco43.`categId` IN ( ) AND
ttif1.`fieldId`=? AND tob47.`type` = 'trackeritem' AND tco47.`categId` IN ( ) GROUP BY
tti.`itemId` ORDER BY `sortvalue` desc...
```

You can notice that the syntax uses in "IN ()" clause which is not accepted by MYSQL.

Solution, first steps

Check all SQL queries for "IN()" clause and find a bypass anywhere in tikiwiki.
