Description
When selecting a Machine Translation, the resulting page is "broken" — the left & right columns appear after/under the center column.

Tested with 5.0SVN on http://info.tikiwiki.org with FiveAlive theme

To duplicate:

1. Go to home page: http://info.tikiwiki.org/tiki-index.php?page=HomePage
2. Select machine translation: Spanish

The left column in the Spanish translation is at the bottom of the page.

Solution
Using Google translate should not break themes.

If I set up this, the browser will stop downloading the page.
So it appears Blank.

Anyone has found a solution for this?

Pascal St-Jean 21 Nov 13 16:46 GMT-0000

This has been removed from info.t.o for a while now
