### Description

I have Staging + Approval Setup for File Galleries. Browsing the Galleries works fine, Registered Users can see Approved files, Admins can see both Approved and Staging.

When I do a search, Registered Users cannot see any of the Approved files in File Gallery. If I turn on Global Permissions, File (tiki\_p\_download\_files), then Registered Users can see both Approved and Staging. In the Approved category, Registered Users have the download files permission.

Something is funny in the permissions for Searching. This does not appear to follow the category permissions.
