Description

I am trying to test 5.0 RC1 on localhost, but after installing database i received this error message

"Table 'dbxxxxxx.tiki_rss_items' doesn't exist

The query was:

```
SELECT * FROM `tiki_rss_items` WHERE `rssId` IN( ? ) ORDER BY publication_date DESC
```

Values:

1. 8

The built query was likely:

```
SELECT * FROM `tiki_rss_items` WHERE `rssId` IN( '8' ) ORDER BY publication_date DESC"
```

It was the same with 5.0 beta 2, and when i look to my database tiki_rss_items doesn't exist.
Is it a new table with tiki 5? not install with upgrader?

I reinstall my database from 4.2 to 5.0RC1 and i saw that rss-item table has been create.
(Before i went from 4.2 to 5.0 beta 2 and then RC1)
It is OK now
