Description

```
in file tiki-admin_include_login.php
if $_REQUEST%22auth_pear%22 {
check_ticket('admin-inc-login');
simple_set_toggle('auth_create_user_tiki');
```

.....

....

.....

missing 2 lines below.

```
simple_set_value('auth_ldap_emailattr');
simple_set_value('auth_ldap_countryattr');
```

Missing database entries for ldap email and country

Solution

in file db/features.csv

add at end of file this two lines

```
1069,auth_ldap_emailattr,138,,auth_ldap_emailattr,simple,,tiki_p_admin,,,,,
```

```
1070,auth_ldap_countryattr,138,,auth_ldap_countryattr,simple,,tiki_p_admin,,,,,
```

optional (recommended)

in file lib/setup/prefs.php

before correction

```
'auth_ldap_emailattr' => '',
```

after correction

'auth_ldap_emailattr' => 'mail',

after all that mail and country attributes work fine

Hi,

the description of the bug is unclear, but this seems to be fixed in Tiki 5.

If it isn't, or any part of this report is still relevant, please reopen or open a new report.
