Description

since upgrade to 5.x tracker field 'items list' is not displayed in item view. In trunk it's not shown either.

Example in 5.x:

http://www.intercanvis.net/tiki-view_tracker_item.php?trackerId=2&offset=0&sort_mode=lastModified_desc&itemId=1340#content2

Example in trunk:

http://c2c.ourproject.org/tiki/tiki-view_tracker_item.php?itemId=11

It should show a field with all the offers from the same person...

Example for the site running trunk:

[FIELD23] name = Offerings of the same person position = 80 type = 1 options = 1,13,17,1,1,optionsMain = n isTblVisible = n isSearchable = n isPublic = y isHidden = n isMandatory = n

However, you can only see the contents (output) of the field for a tracker item when you are in edit tab, not in view tab.

Solution

Fixed in 5.1 - commit 27933
