### Description

Hi:

I just tried spellcheck, with the provided english dictionary at sf.net (words\_en.sql, etc.). And also added another one as a trial (words\_ca.sql, with 15 catalan words, etc.), coded words with utf-8.

Enabled feature, Created a new page with some words:

abacunarÃfÂ  
AbaconarÃfÂ  
abacunarÃfÂi  
AbaconarÃfÂ  
Abaconara  
abaconara  
perquÃfÂ aixÃfÂ perÃfÂ² vinyals calÃfÂşador  
howto  
howtee  
yeouhooo  
spellchek

The only one shown in red at preview state is "vinyals", having interface either in English or Catalan.

There must be something wrong in the feature.

The only word included in words\_ca.sql is abaconarÃfÂ (non of the others is)

And in words\_en.sql, non of the catalan words are, and I guess yeouhooo is not either...

#### Solution

This is the job of the browser, so no plans to do in Tiki.
