Description

Fulltext search doesn't result all pages where the word is on.

For example search for the word "vodafone" without the quotes, results only 2 pages where it should be 3 or more.

We allready tried to make a full rebuild and also teted it with word_len = 2.

Thanks for help in advance, any questions... let me knoe.

Solution

Switched to search_box, fixed it for me look to the comment.

After switching the module to search_box, it was search_new before, the search results the correct values, that fixed the problem for me. but I think, there's something wrong with the search_new.

sylvie greverend 03 Sep 05 22:42 GMT-0000

The index in serach_new are not automatically refreshed. Ther is a new option in admin -> search in 1.9 to refresh the index on the wiki pages

But if you have mysql, better to use the fullsearch (IMHO) as it has ranking
