Description

Tiki login page wrongfully increments tiki\_pageviews hit count

Solution

Replace this loop

```
if ($feature_stats == 'y') {
    if (isset($user)) {
        if ($count_admin_pvs == 'y' || $user != 'admin') {
            if (!isset($section) or ($section != 'chat' and $section !=
'livesupport')) {
                $tikilib->add_pageview();
            }
        }
    }
}
```

With this one

```
if ($feature_stats == 'y') {
    if (isset($user)) { # Bug fix, otherwise next line counts hits for login page (because
$user='')
        if ($count_admin_pvs == 'y' || $user != 'admin') {
            if (!isset($section) or ($section != 'chat' and $section !=
'livesupport')) {
                $tikilib->add_pageview();
            }
        }
    }
}
```

Importance
