Description

Community / User features /

User Preferences Screen: yes

Community / General /

Show user's real name instead of login (when possible): yes

The realName user preference is not used in trackerlist, tracker, and pretty tracker. Actually, why the when possible? Is not it where implemented?

Note that

- in my case the e-mail is used as the login name
 - it does work when adding new comments to trackers
- used: TW5.0Beta1

Solution

would be happy to see some help
