### Description

Using the supplied .htaccess file, when a non existent file and directory is requested for OThER than .htm files, a 404 is not generated and an unformatted version of the home page is opened. For example see uticacurlingclub.org/junk/junk.htm which generates a normal 404 which is redirected to a custom page, and uticacurlingclub.org/junk/junk.pdb which does not. I suspect this is an issue with .htaccess.

#### Comments

drsassafras 10 Sep 19 19:40 GMT-0000

I have confirmed that this is still an issue with recent versions of Tiki.
