Description

I setup tiki 5.x on CentOS. Installation and initial setup went well. But once I logoff and tried to log back in as admin, or any other users. It always directed me to error 404 says tiki-login.php webpage was not found. I browsed and saw the file was there. Tried to reisntall twice and had same problem. Please help. Thank you.

i have the same Problem.

Just updated to 6.2 and there is no way to login!

thanx for your support

roland
