Description
Create a page using the wysiwyg editor and make some page links.

Then create the page from one of these wanted links.

The wanted links are not converted back to normal wiki links (still look like wanted links)

Solution
Fix in r30184 but this fix does not work when sefurl is on. There is a problem when sefurl is on which is related to the other bug about renaming wiki pages. This will wait for the “Use wiki syntax in WYSIWYG” experimental feature to be complete to fix properly.

See item3586 for more information.
